PROJECTS

ComeUps Movies

Aug. 2016 - Present

Android Application

- Displays currently playing and upcoming movies in theaters.
- Utilized The Movie Database API to retrieve movie data and used YouTube API to play movie trailers. Implemented The Retrofit and JSON libraries to parse JSON outputs.
- Applied model-view-presenter (MVP) paradigm to separate UI and data. Improved code readability and maintainability.

CountryCodes

Jul. 2016

Android Application

- Provides country and exit codes based upon user's current location and calling destination.
- Extracted data from open source GitHub project.
- Features three text fields for user input and two call-to-action buttons for quick access to the generated codes.

TECHNICAL SKILLS

Languages

Proficient: Java

Familiar: Android Development, HTML, CSS, Scala

Software

IntelliJ, Android Studio, Eclipse, Git, Adobe Experience Design
